Inteligencia Artificial

Qué es y cómo hemos llegado hasta el punto actual

“Capacidad de las máquinas y los sistemas de software para realizar tareas que, en teoría, requerirían inteligencia humana para ser realizadas”

1642	First mechanical calculating machine built by French mathematician and inventor Blaise Pascal.	1837	First design for a programmable machine, by Charles Babbage and Ada Lovelace.	1943	Foundations of neural networks established by Warren McCulloch and Walter Pitts, drawing parallels between the brain and computing machines.	1950	Alan Turing introduces a test—the Turing test—as a way of testing a machine's intelligence.	1955	'Artificial intelligence' is coined during a conference devoted to the topic.	1965	ELIZA, a natural language program, is created. ELIZA handles dialogue on any topic; similar in concept to today's chatbots.
2009		2002		2002		1997		1980s			
2011	Google builds the first self-driving car to handle urban conditions.	2011-2014	iRobot launches Roomba, an autonomous vacuum cleaner that avoids obstacles.	2014		2016	 	2018			
	 										
	IBM's Watson defeats champions of US game show Jeopardy!		Personal assistants like Siri, Google Now, Cortana use speech recognition to answer questions and perform simple tasks.		Ian Goodfellow comes up with Generative Adversarial Networks (GAN).		AlphaGo beats professional Go player Lee Sedol 4-1.		Most universities have courses in Artificial Intelligence.

OpenAI forms exclusive computing partnership with Microsoft to build new Azure AI supercomputing technologies

July 22, 2019 | Microsoft News Center

This agreement follows our previous investments in 2019 and 2021. It [extends our ongoing collaboration](#) across AI supercomputing and research and enables each of us to independently commercialize the resulting advanced AI technologies.

- **Supercomputing at scale** – Microsoft will increase our investments in the development and deployment of specialized supercomputing systems to accelerate OpenAI's groundbreaking independent AI research. We will also continue to build out Azure's leading AI infrastructure to help customers build and deploy their AI applications on a global scale.
- **New AI-powered experiences** – Microsoft will deploy OpenAI's models across our consumer and enterprise products and introduce new categories of digital experiences built on OpenAI's technology. This includes Microsoft's [Azure OpenAI Service](#), which empowers developers to build cutting-edge AI applications through direct access to OpenAI models backed by Azure's trusted, enterprise-grade capabilities and AI-optimized infrastructure and tools.
- **Exclusive cloud provider** – As OpenAI's exclusive cloud provider, Azure will power all OpenAI workloads across research, products and API services.

OpenAI announces leadership transition

...

OpenAI announces leadership transition

Viernes, 17 de Noviembre

Chief technology officer Mira Murati appointed interim CEO to lead OpenAI; Sam Altman departs the company.

Search process underway to identify permanent successor.

The board of directors of OpenAI, Inc., the 501(c)(3) that acts as the overall governing body for all OpenAI activities, today announced that Sam Altman will depart as CEO and leave the board of directors. Mira Murati, the company's chief technology officer, will serve as interim CEO, effective immediately.

Ilya Sutskever 
@ilyasut

I deeply regret my participation in the board's actions. I never intended to harm OpenAI. I love everything we've built together and I will do everything I can to reunite the company.

Sábado, 18 de Noviembre

The OpenAI board is in discussions with Sam Altman to return to the company as its CEO, according to multiple people familiar with the matter. One of them said Altman, who was suddenly fired by the board on Friday with no notice, is “ambivalent” about coming back and would want significant governance changes.

Update, 5:35PM PT: A source close to Altman says the board had agreed in principle to resign and to allow Altman and Brockman to return, but has since waffled — missing a key 5PM PT deadline by which many OpenAI staffers were set to resign. If Altman decides to leave and start a new company, those staffers would assuredly go with him.

To the Board of Directors at OpenAI,

OpenAI is the world's leading AI company. We, the employees of OpenAI, have developed the best models and pushed the field to new frontiers. Our work on AI safety and governance shapes global norms. The products we built are used by millions of people around the world. Until now, the company we work for and cherish has never been in a stronger position.

The process through which you terminated Sam Altman and removed Greg Brockman from the board has jeopardized all of this work and undermined our mission and company. Your conduct has made it clear you did not have the competence to oversee OpenAI.

When we all unexpectedly learned of your decision, the leadership team of OpenAI acted swiftly to stabilize the company. They carefully listened to your concerns and tried to cooperate with you on all grounds. Despite many requests for specific facts for your allegations, you have never provided any written evidence. They also increasingly realized you were not capable of carrying out your duties, and were negotiating in bad faith.

The leadership team suggested that the most stabilizing path forward - the one that would best serve our mission, company, stakeholders, employees and the public - would be for you to resign and put in place a qualified board that could lead the company forward in stability. Leadership worked with you around the clock to find a mutually agreeable outcome. Yet within two days of your initial decision, you again replaced interim CEO Mira Murati against the best interests of the company. You also informed the leadership team that allowing the company to be destroyed "would be consistent with the mission."

Your actions have made it obvious that you are incapable of overseeing OpenAI. We are unable to work for or with people that lack competence, judgement and care for our mission and employees. We, the undersigned, may choose to resign from OpenAI and join the newly announced Microsoft subsidiary run by Sam Altman and Greg Brockman. Microsoft has assured us that there are positions for all OpenAI employees at this new subsidiary should we choose to join. We will take this step imminently, unless all current board members resign, and the board appoints two new lead independent directors, such as Bret Taylor and Will Hurd, and reinstates Sam Altman and Greg Brockman.

Emmett Shear Becomes Interim OpenAI CEO as Altman Talks Break Down

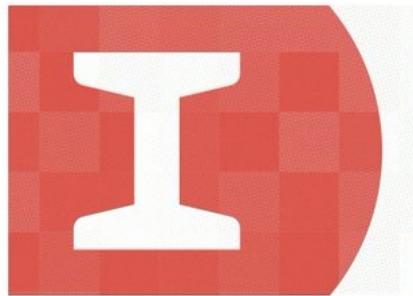

By Amir Efrati

Nov. 19, 2023 8:58 PM PST · Comment by Alberto Romero

Subscribe Now

Sam Altman won't return as CEO of OpenAI, despite efforts from the company's executives to bring him back, co-founder and board director Ilya Sutskever told staff Sunday night. After a weekend of negotiations with the board of directors that fired him Friday, as well as with its remaining leaders and top investors, Altman will not return to the startup he co-founded in 2015, this person said. Emmett Shear, co-founder of video streaming site Twitch, will take over as interim CEO, Sutskever said.

The decision could deepen a crisis precipitated by the board's sudden ouster of Altman and its removal of President Greg Brockman from the board Friday. Brockman resigned later that day, followed by three senior researchers, threatening to set off a broader wave of departures to OpenAI's rivals, including Google, and to a new venture Altman has been plotting in the wake of his firing.

@satyanadella

...

We remain committed to our partnership with OpenAI and have confidence in our product roadmap, our ability to continue to innovate with everything we announced at Microsoft Ignite, and in continuing to support our customers and partners. We look forward to getting to know Emmett Shear and OAI's new leadership team and working with them. And we're extremely excited to share the news that Sam Altman and Greg Brockman, together with colleagues, will be joining Microsoft to lead a new advanced AI research team. We look forward to moving quickly to provide them with the resources needed for their success.

Miércoles, 22 de Noviembre

OpenAI  @OpenAI · 22 nov. 2023

We have reached an agreement in principle for Sam Altman to return to OpenAI as CEO with a new initial board of Bret Taylor (Chair), Larry Summers, and Adam D'Angelo.

We are collaborating to figure out the details. Thank you so much for your patience through this.

Getty Images lawsuit says Stability AI misused photos to train AI

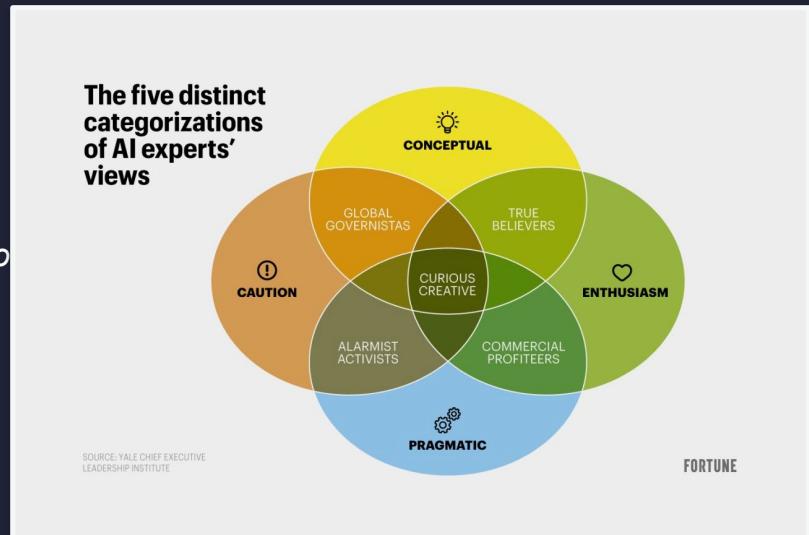

By Blake Brittain

February 6, 2023 6:32 PM GMT+1 · Updated a year ago

5 escuelas de pensamiento sobre la IA generativa

1. **Creyentes:** *La salvación a través de los sistemas*
2. **Especuladores:** *Vender exageraciones sin fundamento*
3. **Creadores:** *Innovación en las fronteras del conocimiento*
4. **Alarmistas:** *Defender normas unilaterales*
5. **Gobernantes:** *Equilibrio mediante directrices*

Creyentes

Vieron el potencial de una tecnología emergente cuando pocos lo hacían, y mucho antes de que entrara en la corriente dominante.

Figuras notables como Yann LeCun y Marc Andreessen son optimistas sobre el futuro de la IA, mientras que otros advierten contra el excesivo optimismo.

One of the 'godfathers' of AI says concerns the technology could pose a threat to humanity are 'preposterously ridiculous'

Grace Dean Jun 15, 2023, 12:12 PM CEST

Yann LeCun. Meta Platforms

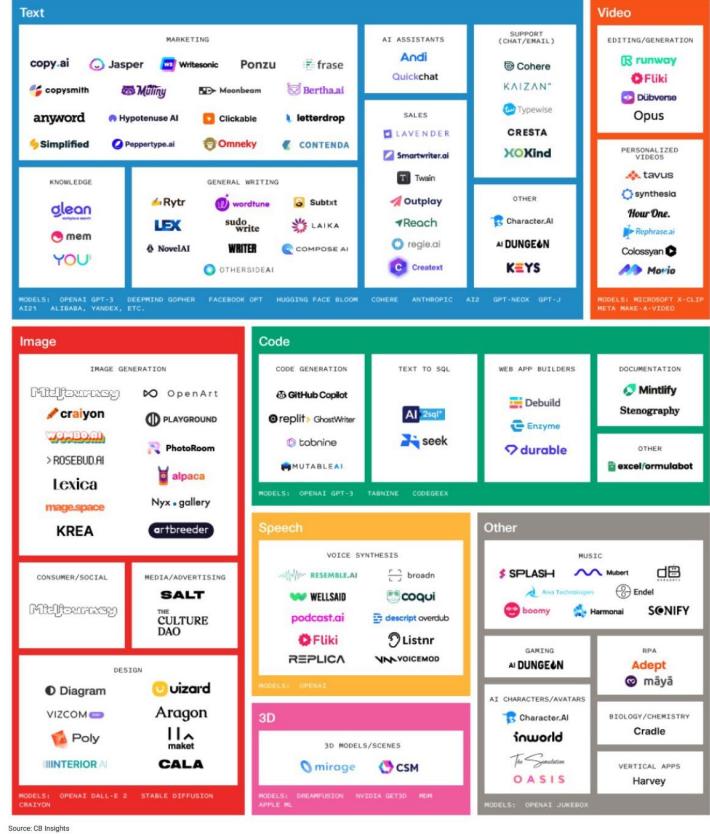

Especuladores

Muchas nuevas empresas de inteligencia artificial carecen de productos sólidos o de una dirección clara y son dirigidas por fundadores con limitado conocimiento real de la tecnología.

Aunque algunas podrían ser fundamentales para el futuro desarrollo de la IA, la mayoría probablemente no lo logrará.

Morgan Stanley | RESEARCH

Exhibit 9: The generative AI landscape: Who are some of the key players?

Creadores

- ❖ Actualmente, la inteligencia artificial está avanzando gracias a mejoras en datos, modelos, algoritmos y hardware. Sin embargo, hay preocupaciones de que un enfoque excesivamente positivo hacia la IA puede ser tan ingenuo como el enfoque previo de Robert Oppenheimer antes de la bomba atómica.
- ❖ “When you see something that is technically sweet, you go ahead, and do it and you argue about what to do about it only after you have had your technical success. That is the way it was with the atomic bomb” *In the Matter of J. Robert Oppenheimer, USAEC Transcript of Hearing Before Personnel Security Board (1954)*

Alarmistas

Figuras como Geoffrey Hinton y Roger McNamee destacan los riesgos de la IA, mientras que otros, como el CEO de OpenAI, Sam Altman, advierten sobre la IA convirtiéndose en una amenaza al nivel de la guerra nuclear.

A veces se puede cuestionar la motivación de estos alarmistas, ya que pueden beneficiarse de la atención que se da a sus puntos de vista.

TECH • A.I.

Sam Altman and other technologists warn that A.I. poses a ‘risk of extinction’ on par with pandemics and nuclear warfare

BY TRISTAN BOVE

May 30, 2023 at 4:32 PM GMT+2

OpenAI CEO Sam Altman is warning about A.I.’s existential risks.
WIN MCNAMEE—GETTY IMAGES

Gobernantes

Muchos líderes legislativos, economistas e influenciadores creen en la necesidad de directrices para prevenir daños sociales a gran escala.

Algunos ven los riesgos de la IA en términos de desplazamiento laboral y supresión salarial, otros temen que la dependencia de la IA pueda hacer que la gente confíe demasiado, incluso en situaciones potencialmente dañinas.

copyright. However, as discussed below, the images in the Work that were generated by the Midjourney technology are not the product of human authorship. Because the current registration for the Work does not disclaim its Midjourney-generated content, we intend to cancel the original certificate issued to Ms. Kashtanova and issue a new one covering only the expressive material that she created.

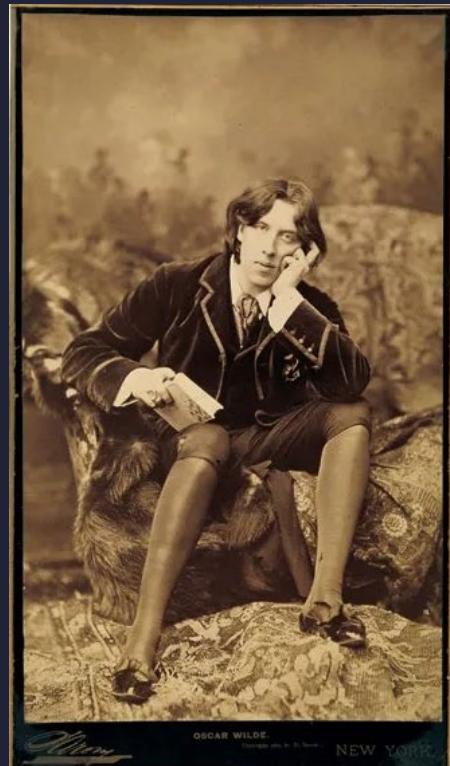

Opinion: The Copyright Office is making a mistake on AI-generated art

Timothy B. Lee, Ars Technica, 22/9/2023

En 1880, se discutió si la ley de copyright debería cubrir la fotografía (porque no era un proceso creativo, sino mecánico)

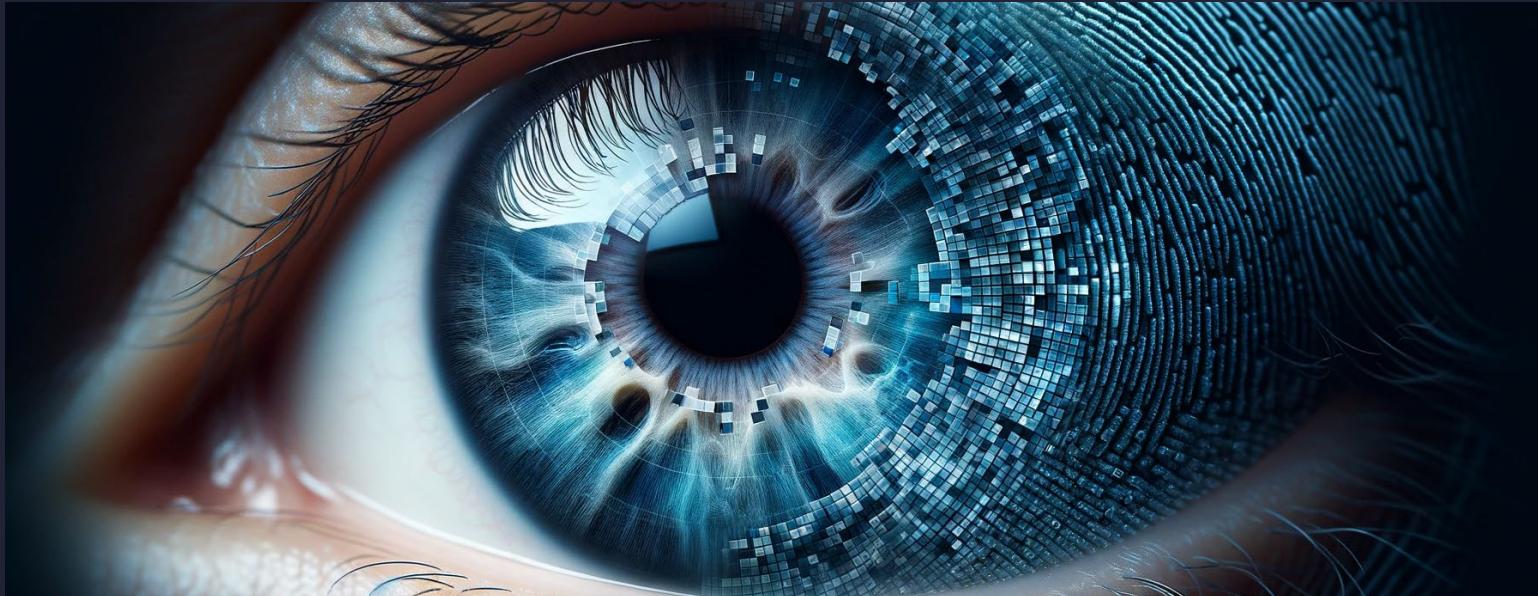

Napoleon Sarony demandó a una compañía que usó sin permiso una de sus fotos de Oscar Wilde

El Tribunal Supremo decidió que las fotografías "ordinarias" no estaban protegidas pero que Sarony eligió la postura, las ropas, la escena, la iluminación...

Privacidad y Protección de Datos

¿Qué garantías tenemos de que los datos que le proporcionemos a la IA no sean difundidos?

Protección de datos en Europa

The screenshot shows a news article from EL PAÍS. At the top, there are navigation links for 'EL PAÍS' and 'Tecnología'. Below the title, there is a 'SUSCRIBETE' button and a 'INICIAR SESIÓN' button. The main headline reads: 'ITALIA BLOQUEA EL USO DE CHATGPT POR INCUMPLIR LA NORMATIVA DE PROTECCIÓN DE DATOS'. A sub-headline below it states: 'El regulador también critica que la herramienta de inteligencia artificial carece de filtros para verificar la edad de los menores'. The author's name is 'LORENA PACHO' and the date is 'Roma - 31 MAR 2023 - 17:37 CEST'. At the bottom, there are social media sharing icons.

ITALIA BLOQUEA EL USO DE CHATGPT POR INCUMPLIR LA NORMATIVA DE PROTECCIÓN DE DATOS

El regulador también critica que la herramienta de inteligencia artificial carece de filtros para verificar la edad de los menores

LORENA PACHO
Roma - 31 MAR 2023 - 17:37 CEST

El Garante italiano para la Protección de Datos Personales, una autoridad administrativa independiente que vela por la protección de datos de los usuarios y consumidores, considera que la plataforma recoge datos de los usuarios de manera ilegal y ha abierto una investigación para esclarecer el funcionamiento preciso de esta herramienta y determinar si ha cometido una infracción.

La autoridad italiana alega, basándose en "las comprobaciones efectuadas" que la información facilitada por ChatGPT "no siempre se corresponde con los datos reales", lo que según el garante "da lugar a un tratamiento inexacto de los datos personales".

Por último, Italia lamenta "la ausencia de todo tipo de filtro" en la verificación de la edad de sus usuarios, a pesar de que el servicio esté dirigido a mayores de 13 años. Y reprueba "la exposición de los menores a respuestas totalmente inadecuadas con respecto a su nivel de desarrollo y autoconocimiento".

Addressing criticism, OpenAI will no longer use customer data to train its models by default

Kyle Wiggers

@kyle_l_wiggers / 7:00 PM GMT+1 • March 1, 2023

Comment

 Image Credits: David Paul Morris/Bloomberg / Getty Images

As the [ChatGPT](#) and Whisper APIs launch this morning, OpenAI is changing the terms of its API developer policy, aiming to address developer — and user — criticism.

Starting today, OpenAI says that it won't use any data submitted through its API for "service improvements," including AI model training, unless a customer or organization opts in. In addition, the company is implementing a 30-day data retention policy for API users with options for stricter retention "depending on user needs," and simplifying its terms and data ownership to make it clear that users own the input and output of the models.

Announcing the first Machine Unlearning Challenge

THURSDAY, JUNE 29, 2023
Posted by Fabian Pedregosa and Eleni Triantafillou, Research Scientists, Google

Deep learning has recently driven tremendous progress in a wide array of applications, ranging from [realistic image generation](#) and [impressive retrieval systems](#) to [language models that can hold human-like conversations](#). While this progress is very exciting, the widespread use of deep neural network models requires caution: as guided by Google's AI [Principles](#), we seek to develop AI technologies responsibly by understanding and mitigating potential risks, such as the propagation and amplification of unfair biases and protecting user privacy.

[☰](#) **digwatch** GENEVA INTERNET PLATFORM [Subscribe](#) | [𝕏](#) [f](#) [o](#) [in](#) [🔍](#)

[Home](#) | [Updates](#) | AI's right to forget – Machine unlearning

22 Aug 2023

AI's right to forget – Machine unlearning

Machine unlearning is a new field in AI that addresses the challenge of forgetting or removing outdated, incorrect, or private data from machine learning models. With the increasing need for models to 'forget' information for privacy, security, and ethical reasons, the concept of machine unlearning has become crucial. Progress has been made in developing unlearning algorithms, but challenges such as efficiency, standardization, privacy, and scalability remain.

Regulación europea

AI Act

The AI Act is the first-ever legal framework on AI, which addresses the risks of AI and positions Europe to play a leading role globally.

The AI Act aims to provide AI developers and deployers with clear requirements and obligations regarding specific uses of AI. At the same time, the regulation seeks to reduce administrative and financial burdens for business, in particular small and medium-sized enterprises (SMEs).

The AI Act is part of a wider package of policy measures to support the development of trustworthy AI, which also includes the [AI Innovation Package](#) and the [Coordinated Plan on AI](#). Together, these measures will guarantee the safety and fundamental rights of people and businesses when it comes to AI. They will also strengthen uptake, investment and innovation in AI across the EU.

MiniGPT-4

Modelo de código abierto
que realiza tareas
complejas de lenguaje
visual

VLog: Video as a Long Document

A partir de un vídeo largo, se convierte a un documento que contiene información visual y sonora, que es enviada a un modelo de lenguaje para chatear sobre el vídeo.

Ask anything

Similar al anterior, permite interactuar con un chatbot acerca de un vídeo dado

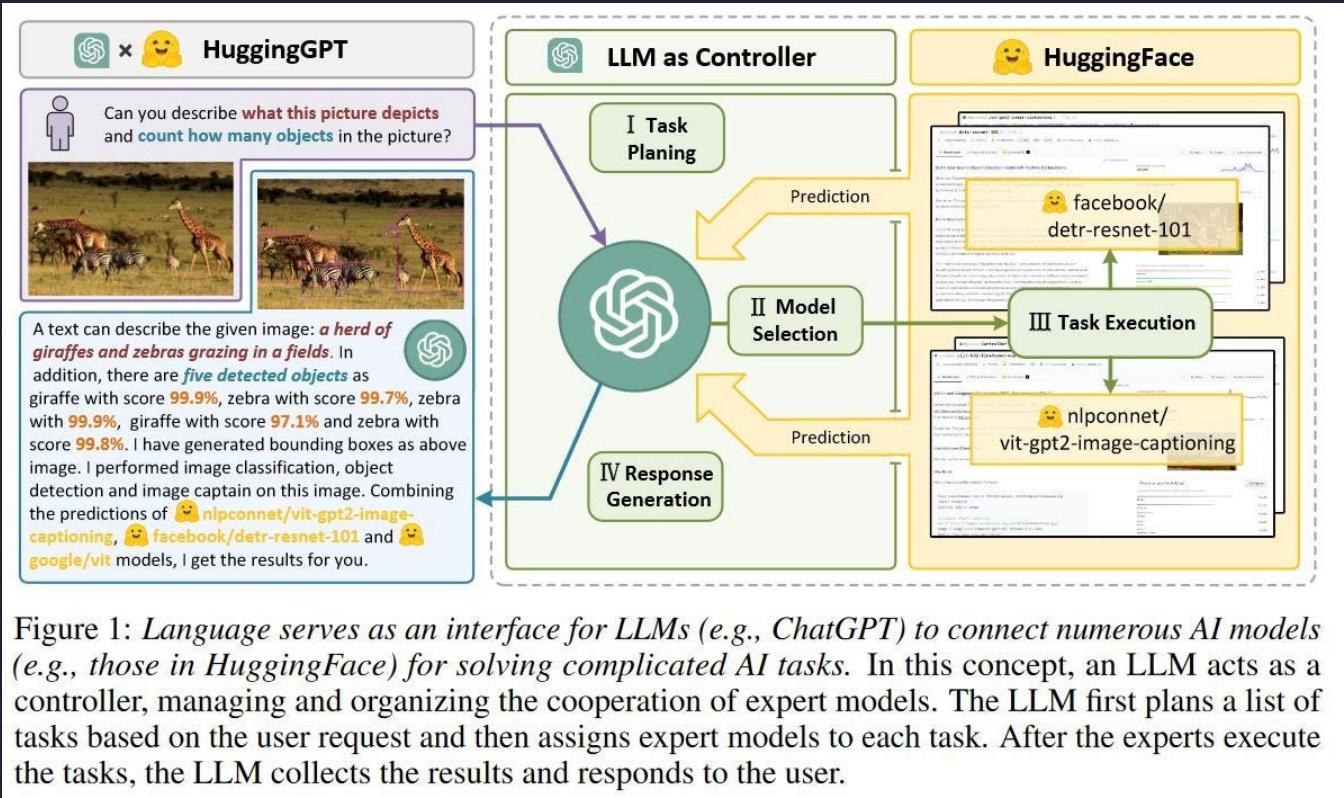

AutoGPT

En lugar de que un usuario vaya introduciendo las peticiones en forma de *prompts*, es el propio modelo el que se autoalimenta basándose en la petición inicial.

BabyAGI

Sistema de gestión de tareas basado en IA. El sistema utiliza las API de OpenAI y Pinecone para crear, priorizar y ejecutar tareas. La idea principal de este sistema crear tareas basándose en el resultado de tareas anteriores y en un objetivo predefinido.

CharacterFactory

"This is the story about Jenny. Jenny lived in a poor family when she was a child. So, she studied hard after going to school. At the age of 25, she found a job as a programmer. Now, she is successful in her career, enjoys coffee, and feels satisfied with her life in New York."
